

# XCELSIUS® PRESENT

## MASTER THE ART OF DATA PRESENTATION

Xcelsius® Present software takes you to a new level for presenting number-intensive reports, such as financial results and complex calculations. Suited for casual business users in organizations of any size, this software transforms Microsoft Excel spreadsheets into interactive data visualizations. Unlike other presentation software, which merely allows you to inform your audience with static tables, charts, and graphs, Xcelsius Present gives you the ability to engage and persuade your audience with interactive data presentations. Next time you give a presentation, bring your data to life with interactivity – so you can be sure to engage your audience and not bore them.

### Make the Winning Argument

Xcelsius Present allows you to turn Excel data into professional-looking presentations through a simple point-and-click interface; no training is required. With our interactive analytics, you present data and complex calculations in a more insightful way than just

static reporting. You can use Xcelsius Present software to engage, inform, and persuade your audience with dynamic visualizations and interactive presentations.

Leverage what-if scenarios – using graphical sliders, gauges, and input boxes – to demonstrate potential performance and outcomes, using data from your Microsoft Excel spreadsheet. Since setting up the analysis requires little backend effort, your users can enjoy real-time discussions for informed decision-making.

### Drive Business Performance

Share the power of information with your team. Xcelsius Present lets you distribute interactive data presentations in Microsoft PowerPoint, Microsoft Word, and Adobe PDF to give your colleagues easy access to business data. In addition, Xcelsius Present integrates with Adobe Acrobat 9, enabling your end users to save their what-if scenario analyses and share it with team members.

Use Xcelsius® Present software to replace countless rows of data and static spreadsheets with eye-catching, interactive visualizations.

The results? Faster, highly informed, and intelligent business decisions that let you capture lucrative market opportunities – before your competitors even realize they exist.

### Take Control and Stand Out from the Crowd

Information overload is a condition plaguing every business decision-maker today. With Xcelsius Present, you can take control of the daily stream of rapidly growing business data to quickly uncover potential problems and take action to fix them – without relying on IT. A familiar Microsoft Excel-based design environment helps you add visual clarity to your data and customize the look and feel of your data presentations to meet your unique needs. Best of all, Xcelsius Present includes 10 preloaded, ready-to-use data presentation templates, so first-time users can immediately use and benefit from the solution. These templates are tailored for specific business functions, such as human resources, sales,

marketing, finance and accounting, as well as different vertical segments like government and education. In just seconds, you can paste your existing data into the templates, creating presentations that help you make a lasting impression in the boardroom. Unique interactive functions let you bring your audience into your presentation and give deeper insight into data and its interrelationships, and shorten the time required to reach final decisions. With Xcelsius Present, your colleagues will never look at you – or your data – the same way again.

### How It Works

Xcelsius Present is a Microsoft Windows application designed to create flash-based data presentations from Microsoft Excel spreadsheets. It offers a feature-rich library of ready-to-use charts, maps, gauges, progress

bars, and more for creating interactive and engaging data visualizations. Its point-and-click interface lets you quickly connect prebuilt charts and graphics to Microsoft Excel spreadsheets, and deliver them live as part of Microsoft PowerPoint, Microsoft Word, or Adobe PDF document.

### Features

As an excellent complement to Microsoft Excel, Xcelsius Present lets you build:

- **Dynamic charts and graphs**, including bar charts, pie charts, and other insightful information displays
- **Microsoft Excel-based dashboards**, to consolidate multiple spreadsheets into a single visual interface
- **Data presentations**, helping you communicate necessary information to executives, customers, partners, and other business users

Figure 3: Income Statement Template

- **Visual what-if scenarios**, to envision potential business models and enrich decision making
- **Budget plans**, accommodating any number of schedules and formats
- **Executive summaries**, for highlighting key information
- **Forecast models**, tailored to your organization's needs
- **Visual business analytics**, for simplifying your business key performance indicators
- **ROI calculators**, for assessing return on investment
- **Financial models**, to support key financial operations
- **And more!**

## Licensing

For each copy purchased, you may:

- **Design data presentations** – One named user may install and use Xcelsius Present features to create data presentations and visual models. A design license cannot be shared among multiple individuals. If you require additional design licenses, you can purchase additional Xcelsius Present licenses.
- **Share data presentations** – With Xcelsius Present, you may share your data presentations with an unlimited number of users.

Use Xcelsius Present software to engage, inform, and persuade your audience with dynamic visualizations and interactive presentations.
